

Innovative uv technology

sustained • efficient and save • for a clean future

Over 50 years - Quality „Made in Germany“

Beltron GmbH

over 50 years Quality „Made in Germany“

BELTRON produces high quality machinery and equipment for many applications and markets. Generally our partners are from the graphic industry as well as from other industrial applications. Besides the printing and reproduction market and the electronic industry, the brand **“BELTRON”** has been approved in many other fields, such as solar industry, nano technology, uv-hardening of glue, medical industry, glass industry, automobile industry, production of furniture or other wood based applications, manufacturing of concrete plates, are just a few examples from **BELTRON's** manifold partner portfolio.

Beltron GmbH

more than 50 years your partner in UV technology

Which criteria should your new business partner have to become interesting for you?

Besides requirements like quality and reliability, competence, readiness and partnership are the most important features. As many of our business partners confirm, **BELTRON** fulfils these requirements. Of course – our equipment stands in accordance with all main regulations, such as CE, DIN or SMEMA. Over 50 years quality and experience combined with **“Made in Germany”** – which is still **BELTRON's** policy.

Design and engineering in 3D and most modern CNC and laser production enables us to fulfil all partner specific requirements. Your needs and wishes must not be what we have – our possibilities must be according to your needs. Furthermore **BELTRON** offers his customers a minimized spare parts stock as we have our own spare parts storage. More than 20.000 different articles including UV lamps etc. are available for your requirements. Besides a strong network of local partners, **BELTRON** has business relations to customers all over the world in almost all countries.

Want to try? Your Satisfaction is our target...

UV-IR dryer BE 20

Application:

For drying and polymerization of uv screen inks, uv adhesives for printed circuit boards, laminated materials, plastic, paper, glass, metal and other printed materials in flow process.

The lamp power lasts from 80 to 120 W/cm and the machines are equipped with 1 to 3 uv lamps. As well as up to 3 IR modules. This UV-IR dryers are used for laboratory operation or small size production.

Design:

Teflon belt (PTFE-coated) or stainless steel belt, belt width 200 mm with uv lamps , with special aluminum reflectors mit or (upon request) with selective filters for temperature reduction, entire lamp unit can be raised 70 to 120 mm, dryer can be moved due to rolls, inlet and outlet for different materials can be adjusted between 20 and 50 mm, stepless belt speed control in the range of 1,5-15 m/min (other ranges upon request) and exhaust/cooling fan.

Compact Control, display of various parameters such as UV set value, operating hours, lamp current. The Compact Control also controls the following tasks: lamp ignition, lamp fuses, idle run, over temperature, exhaust air, converter, installed power 400V (other power optional).

Technical Information UV-IR dryer BE 20

- Belt: Metal belt
- Control: Compact control - Option: PLC control
- Lamp: 1, 2 or 3 uv lamps
- Lamp filling: Hg (Mercury), Fe (Iron) or Ga (Gallium)
- Lamp power: 80 - 120 W/cm
- IR-Modules: 1 to 3 medium waves IR-Modules
- Electrical supply: 400 V / 50 Hz / 3~
- CE-Sign

The UV-IR dryer BE 20 are used successfully in:

printing industry, electronic industry, plastic industry, building materials industry, textile industry, packaging industry, pharmaceutical industry, automotive industry, glass industry and engineering.

These are just a few examples from the various partner portfolio of Beltron.
